SUMMARY

I am Darshan M Allurkar, a student passionate about technology and problem-solving, with skills in Web Development, Python, C, and Java. I am currently enhancing my knowledge in Backend Development, Data Science, and Analytics to build a strong foundation for future roles. I have worked on projects such as NoteVault (a secure note-taking app), Face Tracker and Gesture Recognition, and a Farm to Market Supply Chain Optimizer for a hackathon, which helped me gain hands-on experience in real-world applications. Being adaptable and eager to learn, I am open to opportunities where I can contribute effectively while expanding my technical expertise.

QUALIFICATIONS
